

A3/3

The location is Valencia, Spain. The targeted participants are students who are studying at either FM KASZK Táncsics Mihály Vocational School of Agriculture, Varga Márton Vocational School of Horticulture and Landscaping, Dr. Szepesi László Vocational School of Forestry in years 10-14.

It is a short term programme, the duration is 19+2 days. Their workplaces will be farmlands where they will work in groups of 2-3 people. The working hours for students under 18 is 7 hours a day, for students over 18 it is 8 hours a day, in accordance with the labour law.

1st day: introducing the workplace and its rules, meeting the technicians, education about labour safety

2nd-14th day: doing technical practices, which may include the following activities:

- tillage
- harvesting
- taking care of the crop
- operating agricultural machines
- feeding and taking care of animals
- selling products

15th day: closing the technical activities, evaluating the achievements of the students in accordance with their own and their teachers' opinion.

The following competencies will be improved:

- responsibility
- reliability
- dexterity
- following the rules
- hygiene
- cooperation
- drawing conclusions

In the afternoon there is a one hour period, when they write their reports, and talk about their progress. In the remaining free time in the afternoon and at the weekends the students participate in recreational and cultural activities based on their interests.
